

**THERMAL SCIENCE
TECHNOLOGIES**
Saving Energy with Innovative Insulation Solutions

COMPANY BRIEF

Thermal Science Technologies, LLC (TST) provides innovative insulation solutions for steam and hot water distribution systems. Turnkey applications of insulation technologies such as ConduFill®, Removable Insulation Covers and conventional pipe insulation allow our contracting team to thermally restore piping, valves and other equipment at federal facilities, pharmaceutical facilities, college campuses, hospitals, commercial facilities and industrial plants. TST's field technicians are trained and qualified to perform insulation assessments that will identify where a facility will benefit most from insulation repairs and upgrades. Our detailed energy audits provide clients and end-users with annual savings estimates for our recommended solutions.
